Organometallic Synthesis of Carbosilanes

Professor Dr. Gerhard Fritz
Institut für Anorganische Chemie der Universität Karlsruhe

Contents

A. Introduction .............................................. 46
   1. Historical Development of the Synthesis of Si–C Bonds ...... 46
   2. The Si-phenyl Group as a Protective Group ............... 48
   3. Preparation of me₂C₆H₅Si–CH₂Li ..................... 49
   4. Metal-halogen Exchange Reactions of C₆H₅meSi–CH₂Li .... 49

B. Cyclic Carbosilanes ...................................... 51
   I. Monocyclic Compounds .................................... 51
      1. The Linear Compounds C₆H₅(me₂Si–CH₂)ₙBr and Br(me₂Si–CH₂)ₙBr .......................... 51
      2. Cyclizations of (me₂Si–CH₂)ₙ ........................................ 53
   II. Bicyclic Carbosilanes .................................... 55
      1. Synthesis of 1,3,5,7,7-Hexamethyl-1,3,5,7-tetrasila-bicyclo-
         [3.3.1]nonane ........................... 55
         a) me(CH₂Cl)₂Si–CH₂–Si(C₆H₅)₂me ........................................ 56
         b) me(CH₂Cl)₂Si–CH₂–SiBr₂me ........................................ 56
         c) me(CH₂Cl)₂Si–CH₂–SiC₁₂[CH₂–SiC₁₂(C₆H₅)]₂ ............. 56
         d) me(CH₂Cl)₂Si–CH₂–SiC₁₂[CH₂–SiC₁₂Br]₂ ................ 57
         e) Cyclization to Tetrasilan nonane ..................... 57
      2. Synthesis of 1,3,5,7-Tetrasila-bicyclo-[3.3.1]nonanes
         Containing Si-functional Groups ................................. 58
         a) Reaction of (Cl₂Si–CH₂)₃I₃ and its Derivatives with
            (CH₂Cl)₂SiC₁₂ ........................................ 59
         b) Remarks on the Methylation of the SiCl-Containing
            2,3,5,7-Tetrasila-bicyclo[3.3.1]nonanes .................. 60

43
3. Synthesis of Cis- and Trans-Pentasiladecaline
   a) Reaction of Dihalo-methanes with me₂SiCl and Li(Mg) ..... 61
   b) Reaction of Trihalo-methanes with me₂SiCl and Li(Mg) ..... 62
4. Synthesis of Cis- and Trans-Pentasiladecaline
   a) Synthesis of the Starting Material ..... 64
   b) Cyclization of Compound 23 to Compound 21 ..... 65
   c) Isolation and Identification of the Cis- and Trans-Nona-
      methyl-1,3,5,7,9-pentasiladecaline ..... 66
   d) Synthesis of another Bicyclic Carbosilane, Compound 32 ..... 67
5. Synthesis and Reactions of Si-functional 1,3,5,7-Tetrasilacyc-
   octanes ..... 69
III. Tricyclic Carbosilanes ..... 70
   1. Synthesis of Cis, Trans-, and Trans,Trans-Hexasila-
      perhydrophenaline ..... 70
      a) Synthesis of Linear Carbosilanes with Functional Groups ..... 73
         α) Synthesis of Functional Carbosilane Chains with Two
            Si Atoms ..... 73
         β) Synthesis of Si-functional Carbosilanes with Four
            Si Atoms ..... 76
         γ) Synthesis of Si-functional Carbosilane Chains with Six
            Si Atoms ..... 77
      b) Cyclization of me₂HSi—CH₂[Si(Si₂—CH₂—Si(CH₂Br)₂]+
         Si₂—CH₂Br ..... 78
      c) Ring-partition by CHBr₃ and Li to Si-methylated
         1,3,5,7,9,11-Hexasila-perhydro-phenaline ..... 79
      d) Isolation of Cis, Trans and Trans,Trans-
         Hexasila-perhydrophenaline ..... 79
   2. Synthesis of Tetrasila-bicyclo-[2.2.2]-octane ..... 81
   3. Synthesis of Heptasila-[4.4.4]-propellane ..... 82
C. Synthesis of 1,3-Disilacyclopentenes and Related compounds ..... 83
I. The Synthesis of 1,3-Disilacyclopentenes ..... 84
II. Synthesis of 1,1,3,3-Tetramethyl-1,3-disila-2(methylene)-
    cyclobutane ..... 87
   1. Addition of C₅H₅me₂SiH to me₂(CH₂Br)Si—C=CH ..... 89
   2. Reaction of the Addition Products with HBr ..... 89
   3. Cyclization to 1,1,3,3-Tetramethyl-1,3-disila-2(methylene)-
      cyclobutane ..... 90
III. Synthesis of 1,3-Disilacyclopentanes ..... 92
   1. 1,1,3,3-Tetramethyl-1,3-disilacyclopentane ..... 92
