Chapter 9

Sounds: Ring and Vibrate

Your BlackBerry can be customized in many ways. One area that lends itself to customization on the BlackBerry is the area of sound and ring tones. In this chapter we will explain the various profiles that can be adjusted.

You will learn how to make your BlackBerry ring, vibrate, ring and vibrate, or make no sound at all.

You will find that you can customize your BlackBerry for individual situations and even individual contacts by setting unique ring tones and vibrations, so you can immediately tell who is calling, texting, or even e-mailing you.

Set Phone Ring Tones from the Music App

The BlackBerry gives you a couple options for using media files as ring tones. You can choose to use songs or pre-loaded files when your phone rings.

Setting a Song as Your Ring Tone

You can set a song as a ring tone with only a couple of steps:

1. Navigate to and play the song you want to use as a ring tone, as described previously.

2. Press the Menu key and select Set as Ring Tone.

Now, the next time you receive a call, the specified song will be played.
Using a Pre-Loaded Ring Tone

If you want to use a pre-loaded ring tone instead of a song, then follow these steps:

1. Select Ring Tones.

2. Select All Ring Tones, My Ring Tones, or Preloaded Ring Tones.

3. 

4. Next, scroll down the list and click the Trackpad to listen to a selected ring tone.

5. You can also type a few letters to the Find: field to find a ring tone that matches the letters you type.

   **TIP:** Type in Ringer to find all your phone’s ring tones.

6. Once you find the ring tone you want, press the **Menu** key and select **Set As Ring Tone**.
