Chapter 31

Radome Electromagnetic Design

G. P. Tricoles

General Dynamics

CONTENTS

1. Introduction 31-3
   Radome Performance Parameters 31-3
   Variables in the Radome Performance Parameters 31-4
2. Physical Description of Radome Effects 31-5
   Fields in Radome-Bounded Regions; Constituent Waves 31-5
   Field Distribution Measurement 31-6
   Wavefront Aberrations and Boresight Error 31-7
   Diffraction Methods for Radome Design 31-8
3. Plane Wave Propagation through Flat Dielectric Sheets 31-10
   Incidence on a Plane Boundary between Two Homogeneous Dielectrics 31-10
   Incidence on Flat, Homogeneous, Dielectric Sheets 31-13
   Incidence on Multilayer Dielectric Sheets 31-14
4. General Aspects of Theoretical Design 31-18
5. Plane Wave Propagation through Dielectric Sheets 31-20
   Direct-Ray Method 31-20
   Surface Integration 31-24
6. Antenna Patterns 31-25
7. Examples of Boresight Error 31-27
8. The Moment Method 31-27
9. Comments on Materials 31-29
10. References 31-30
Gus Tricoles received a BA in physics from the University of California, Los Angeles, in 1955, an MS in applied mathematics from San Diego State College in 1958, and an MS in physics in 1962 and a PhD in applied physics in 1970, both from the University of California, San Diego.

He was employed by General Dynamics from 1955 to 1959 and by Smyth Research Associates from 1960 to 1962; in 1962 he returned to General Dynamics, where he is now Engineering Manager of Electromagnetics in the Electronics Division in San Diego.

Dr. Tricoles' main work has been in propagation and microwave holography with applications to radomes, direction finding, and geological prospecting. He developed analytical methods for radome design and experimental, diagnostic methods for radomes. He has designed radomes for several aircraft and missiles, developed anisotropic radomes and guided-wave antennas, and modeled retinal receptors. He holds 14 patents and has published 20 papers and written many reports. He is a member of US Commissions A, B, and C of URSI, the IEEE Antenna Standards Committee, a Fellow of the Optical Society of America, and a Fellow of the Institute of Electrical and Electronic Engineers.
