2

Central Issues in Psychiatric Epidemiology

1 Introduction 31

2 A Matrix for Organising Epidemiological Knowledge 33

3 Levels of Epidemiological Enquiry into Psychiatric Disorders 34

4 Commonly Used Designs 34

5 Sampling 36
5.1 Principles 36
5.2 Non-Ignorable Non-Response 36

6 Specifying Disorders 36
6.1 Diagnostic Categories 36
6.2 Continuous Measures of Morbidity 37
6.3 Disablement 37

7 Independent Variables: The Domains 38

8 Instruments 39
8.1 Symptom Scales 39
8.2 Standardised Psychiatric Interviews 40
8.3 Instruments for Assessing Dementia and Depression in the Elderly 41
8.4 Typical Prevalence Estimates 41
8.5 Disablement 41
8.6 Aetiological and Other Associated Variables 42
8.6.1 Sociodemographic Variables 42
8.6.2 Social Environment 42
8.6.3 Experiential Variables 42
8.6.4 Personality Variables 42
8.6.5 Genetic Factors 42

Appreciation is expressed to my colleagues at the NHMRC Psychiatric Epidemiology Research Centre who critically read drafts of this chapter.
