6.1 Screws

201.06-20

2.0 mm Cortex Screws
(flatspherical head with cruciform recess)
(spherical head with hexagonal socket, width across flats 1.5 mm)
used for fixation of Mini Plates or as lag screws, chiefly in the orbital region.

211.06-38

2.7 mm Cortex Screws
(spherical head with hexagonal socket, width across flats 2.5 mm)
used for fixation of Dynamic Compression Plates (2.7 mm DCP, EDCP, and Reconstruction Plates). Also used as lag screws for sagittal split osteotomies.

202.06-32

Special 3.5 mm screws for mandibular surgery
(5.0 mm dia. spherical head with hexagonal socket, width across flats 2.5 mm)
provide backup in case a 2.7 mm thread is accidentally stripped.
