Evolution or revolution of the user experience through networked vehicles

Leaders:
Heiko Herchet, Head of Car IT at trive.me,
Johannes Barckmann, Global Design Manager at EDAG
# Table of Contents

1. **Today's HMIs and their challenges**  
   1.1 Distraction as the core problem of HMI operation  
   1.2 Status of today's human-machine interfaces in vehicles

2. **Increasing available features changes user/application relationship**

3. **Requirements from higher automation.**

4. **Evolutionary: Agile prototyping/reduction of innovation cycles**

5. **Revolutionary: Digitizing mobility and its business models**  
   5.1 Mobile devices as enhancement of vehicle HMI  
   5.2 New business models in the field of mobility
