5 Regulation of Adrenergic Receptors

ALBERT O. DAVIES and ROBERT J. LEFKOWITZ

5.1 Introduction
5.2 Background
  5.2.1 Physiological foundations
  5.2.2 The second messenger concept
  5.2.3 Radioligand binding studies
  5.2.4 Biochemical endocrinology
5.3 Adrenergic receptor regulation
  5.3.1 Description of terms
  5.3.2 Homologous down-regulation of the beta-adrenergic
       receptor and desensitization of adenylate cyclase – model
       systems
5.4 Additional examples of homologous down-regulation
  5.4.1 Leukocyte beta-adrenergic receptors
  5.4.2 Asthma
  5.4.3 Tricyclic antidepressants
  5.4.4 Cardiac hypertrophy
  5.4.5 Ageing
  5.4.6 Alpha-adrenergic receptors
5.5 Homologous up-regulation
  5.5.1 Denervation hypersensitivity
  5.5.2 Pharmacological denervation
  5.5.3 Propranolol withdrawal syndrome
5.6 Heterologous regulation
  5.6.1 Neoplasia
  5.6.2 Cardiovascular diseases
  5.6.3 Glucocorticoids
  5.6.4 Estrogens and progestogens
  5.6.5 Hyperthyroidism
  5.6.6 Hypothyroidism
5.7 Special categories of regulation
  5.7.1 Phasic regulation
  5.7.2 Cytoskeletal agents
  5.7.3 Mixed or uncertain regulatory processes
5.8 Implications
